OMNISPHERE 2 EXPANSION

ARCTURUS

ALLEN POLLEY

rms

ROCKY MOUNTAIN SOUNDS

THANK YOU!

Allen and I appreciate your purchase of this special collection of sounds for Spectrasonics Omnisphere 2. Featuring 177 patches, 27 multis and 72 sound sources, Arcturus for Omnisphere 2 will inspire your imagination with sounds for every genre.. Full PlugInGuru Unify support is included with additional bonus patches and optimized Omnisphere multi versions - see included installation guide at end of this manual.
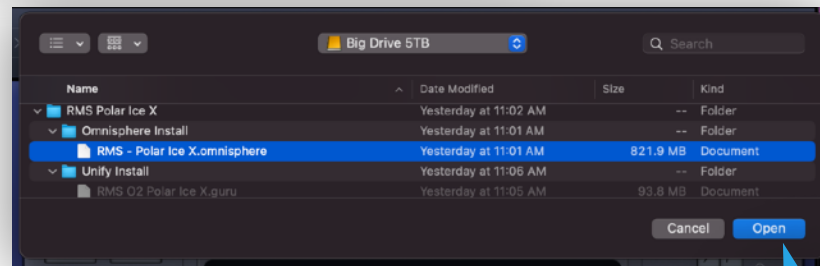

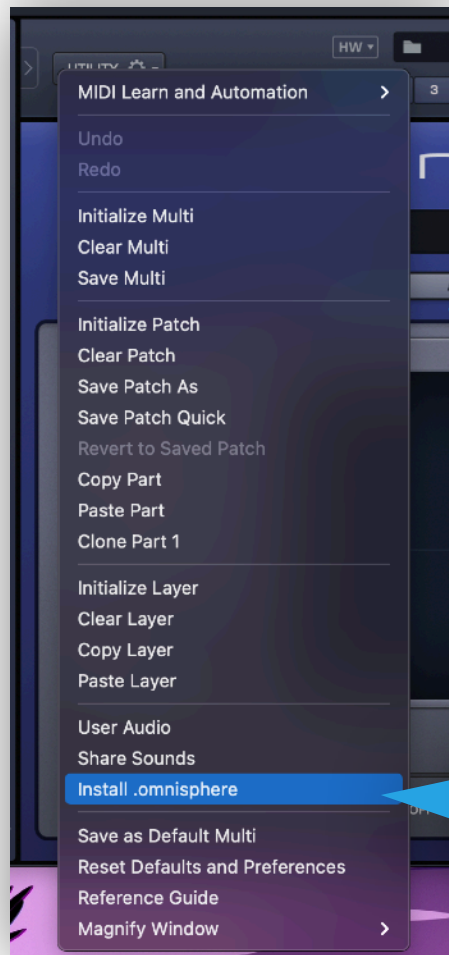

Jason Schoepfer - Sound Designer and owner of Rocky Mountain Sounds.

Omnisphere 2 Installation

To install Arcturus for Omnisphere 2, first open up Omnisphere 2 (the standalone version is ideal as it removes any possible issues a DAW or host may add). *Screenshots show Polar Ice X (also available from RMS!)

A. Select the "**UTILITY**" button on the interface as shown

B. Scroll down and select "**Install .omnisphere**"

C. Navigate to the unzipped download folder, select the Omnisphere Install folder, then select "**RMS - Arcturus .omnisphere**" and click "**Open**"

D. Read the advisory notice and click "**Continue**"

E. This is the final step. The dialogue box will tell you the total number of multis, patches, and custom sound sources that will be installed (see patch list for Arcturus content). This is your last chance to stop installation. Clicking "**OK**" will install all the contents. After a short period of time, you will be able to start exploring Arcturus for Omnisphere 2!

ARP + BPM (30)

BPM BASS - Arcturian Wars
BPM BASS - Arubass
BPM BASS - Into the Unknown

Arcturus - Unify Enhanced

Unify is a revolutionary new type of instrument that lets you layer, play, and combine AU, VST, or VST3 plug-ins to create new, inspiring, and outrageously creative sounds. Not only can you load your own plug-ins, but Unify also ships with its own built-in library of virtual instruments and audio effects, making it immediately ready to use right "out of the box".

Latest Unify manual - https://pluginguru.net/unify/manual/

Arcturus includes a special .guru file located in the Unify Install folder of your download. The following visuals show Polar Ice X (available at RMS) but apply to Arcturus.

To install, **FIRST make sure you have properly installed the .omnisphere master collection** - if you do not do this you will get errors with missing sound sources. Once installed, open up Unify (screen shot

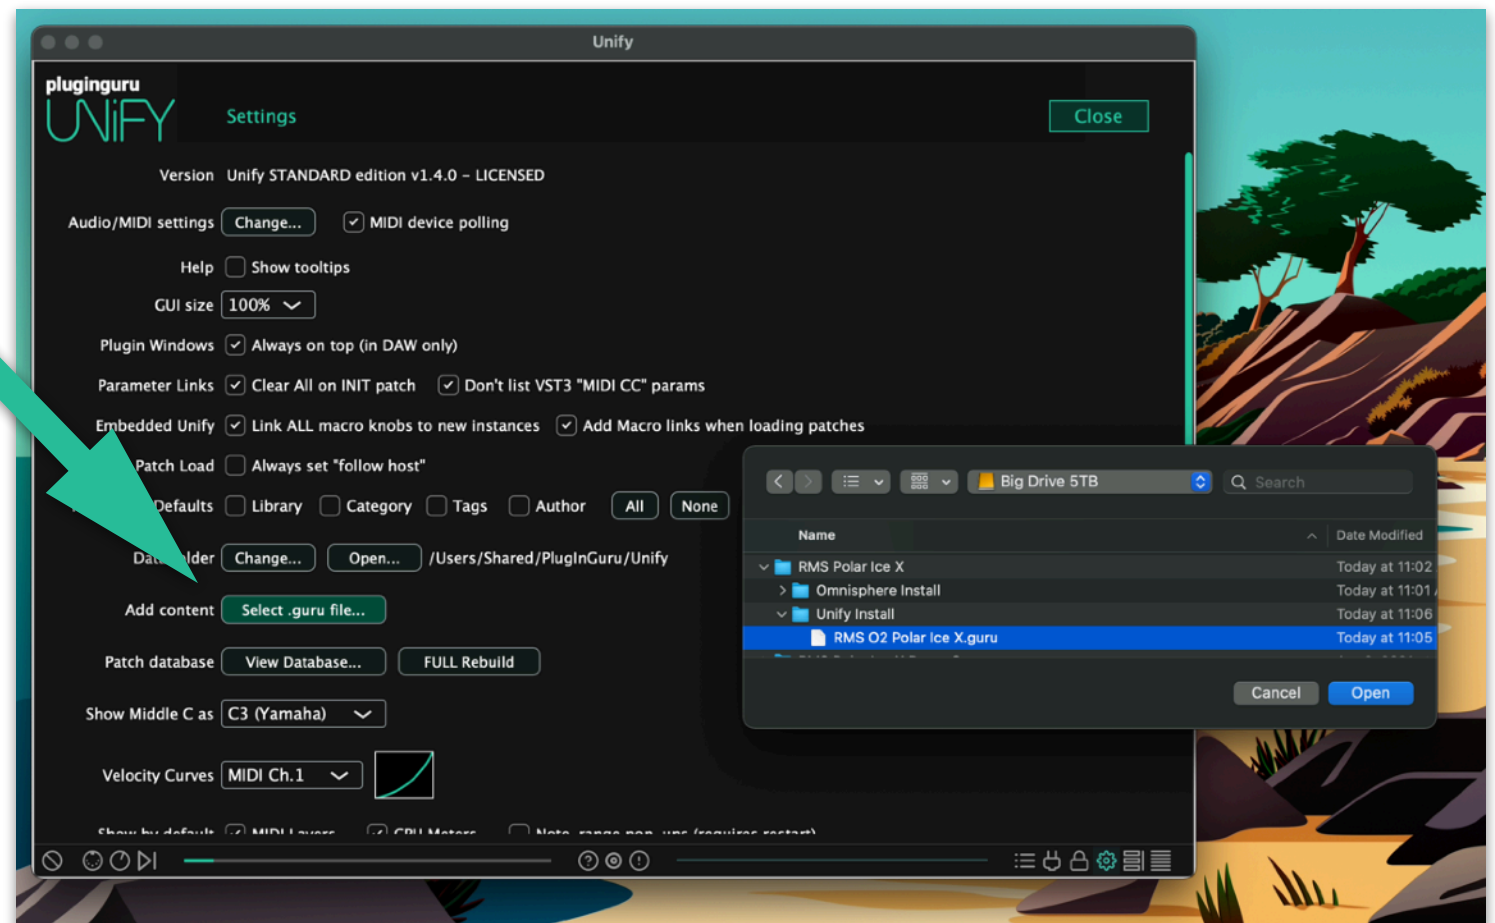

shows standalone version). Click on the gear icon to open up the setup menu

Click on the green "Select .guru file…"

Navigate to the RMS Arcturus Unify Install folder and select **RMS O2 Arcturus.guru**
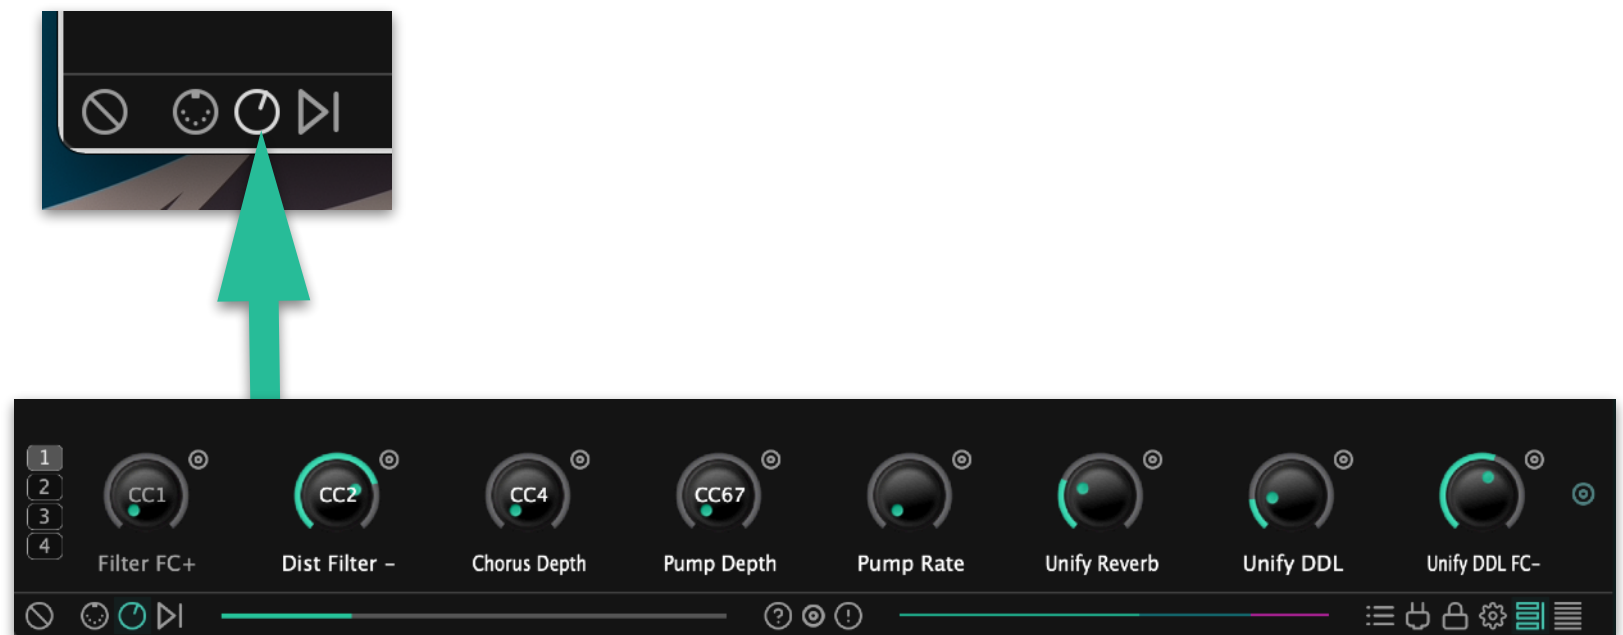

Follow on-screen instructions.

You have now installed the Unified version of Arcturus and can now easily enjoy every patch and multi found in the standalone Omnisphere version.

There are 219 sounds in the Unify Enhanced version. Each sound is mapped to the modwheel. If you click on the Omnisphere instrument box- this will open up Omnisphere.

Clicking on the macro knob icon will open up the macro knob panel - where each Arcturus patch is mapped to creative FX like distortion, chorus, Pump House, reverb and delay. Explore these knobs as they can transform each sound in new and exciting ways (my personal favourite is Pump House - turn up the Pump Depth knob and enjoy!)

There are special bonus patches found only in the Unify Enhanced version of Arcturus - each one starts with a "z" and provide new combinations or take advantage of Unify's CPU load-balancing feature to provide better performance with the original Omnisphere Multis.

15 bonus patches are waiting for you to explore.

Easily combine patches together by SHIFT-CLICKING on new patches to insert the full Unify patch - with proper macro mapping. It is an endless sonic exploration waiting for you dive in! ENJOY!
